Something about prices. People who already ordered here will recognize that we raised some tape prices. This is because trading tapes is getting so expensive through raised post/mail prices. We charge 1 euro more now on most imports from outside Europe. That will mostly hit the us tapes and everything from southeast asia. Sorry for that but we are realy sick of loosing money on most of the imports we sell. Hope you understand

**Rah bras - whom 3€ NEW**

Rah Bras begin again with their latest album WHOHM. For the last decade the trio has been spelunking the nether regions of pop, pomp and punk on a smattering of EPs and 2001's full length Ruy Blas. Their genre defying audio promiscuity has fermented into the anvil-drop-rock of 2005's WHOHM. Heavy synths grind and squeal upon pure propulsion as lyrics wax solipsistic over the cyclical nature of all modren man's foists and foibles. Rogue song structures and plenty of surprises around every corner, Rah Bras continue to master the art of not boring themselves by subjugating the rock idiom to their every whim. Both bizarre and strangely accessible, WHOHM achieves the rare genius of genuine creation in a realm fraught with endless reference and carbon copy replication of tired ideas. (erode)

I played all the instruments which were my good old guitar, my good old bass guitar and the toiletseat (as drums). Everything recorded through a distortion pedal plus finally mixed through a distortion pedal too...

The cover art is such a beauty, the infamous mystery meatpile was found from the front of the door of that same apartment when I came home one, certainly fatal for someone, evening..

**shikari - discography 4€ out of stock**

for me the ultimate screamo violence band mixing up their sound with some metal influences and power-violence stuff. Awesome shit. Among the most intense live bands going, Holland's SHIKARI capture the intensity well. Great American Steak Religion fans take note...heavy mid 90s influence (ONE EYED GOD PROPHECY? I think so.) with loads of double bass and melodic walls of guitar over shrieked vocals. Chaotic metallic tortured violence seeps with very deep and often dark personal lyrics through these 23 tracks. This could easily be one release, but the songs are culled from 5 records and assorted compilations. (bullwhip)

**Souvenirs young america - "September Songs" 4€**

This limited edition cassette features twenty minutes of new, unreleased material from the Richmond, Virginia based trio, SOUVENIR'S YOUNG AMERICA. **the childrens crusade – the second demo 3€**

Ahhh sweet sweet powerviolence, it's back, you know. Two man grind outfit from California that nods liberally to INFEST, TERRORIZER, and all the bands that fall in between. High screams and low cookie monster vokills trade off as the songs race between slow intro jams and blazing fastcore bursts. Not enough 90s for you? Well then let me introduce you to a flurry of Simpson's samples...these dudes are having a blast, so why don't you join them? (blastbeats for freedom)

**war kriminals - "fully automated" 4€**

"Open minded metalheads, speed freaks and other fans of generally weird music definitely need to check out "Fully Automated" by WAR KRIMINALS. What is essentially full-blown drum&bass/techno/electronic/noise mayhem is all fused with healthy amounts of experimentation and all around confounding approaches to songwriting. This is either the work of seasoned veterans or dorm room wizards, but either way it's pretty fucking awesome! Side A of this green cassette tape is mainly glitched-out, sample laden bedlam but side B shows WAR KRIMINALS' more mellow side with tripped out beats, reverby clips and loads of digital delay. Add elements of video game music, foreign language samples, love for anime and (believe it or not) a bit of polka to the mix, and you've got an all around baffling release that works surprisingly well."

**whalers / airplane food sucks - split 3€ out of stock**

another release from this ghostlabel. like on the ein bunter melodienstrauss / mona lisa tripple penetration squad split there is noisecore on this tape. airplane food sucks start the tape with a noisecore mayhem like ein bunter melodienstrauss but sicker. total high vocals, crazy drummings, low-fi recording and all improvised. we counted their songs. there are 40 songs in 10 minutes. whalers come along with a 10 minutes song made of doom and 90's screamo.

**yakuza horror - split 3€**

In the true spirit of European chaos Spanish Yakuza Horror rages on with loud and noisy hardcore throughout the eight tracks on this pro-tape. Dual vocals, one screamer and one growler, sawing guitars, a crunching bass, and d-beat drumming - all done with a brutal rawness. I appreciate this in it's roughness and straight forward approach with no messing around, but at the same time I can find it a bit to regular to really get into. It all depends on what mood I'm in really. If I want uncompromising traditional south European d-beat inferno this is awesome, but if I'm looking for originality and/or more memorable riffs together with the power this isn't really the place to look. But, it's a good tape and if you find it you should pick it up.

**Candy Warhol – s/t 3€**

This is the drummer of 2 excellent german bands: rollergirls & x-ray charles both from the south west area from germany. His one man band candy Warhol is the shit. Awesome and freaked out cybergrind jams with a lot of noisy stuff in it. Also one of the nicest packagings I saw. Green 3" cdr in an wine red cotton bag wich is handsawn and with transparent insert and extra badge/button.

**The groovy orphanage – s/t 3€ soon**

Tino runs TGO now for some time. He started out as a vital one man project linked to the whole myspace cybergrind thing but than qickly turned TGO into something more avantgare. So if you expect dumb guttural hello kitty grind on here you will be disappointed. After a long break with TGO caused through his now sadly defunct noise / comedy band a princess diary he back with an even more experimentel touch on his songs. This cdr contains some old songs but the newer ones are the shit I still have in my ear. Will his old songs were more screaming stuff the new ones are more kiddy like spoken word style and even more noise experimentel than the old chord pattern styled stuff he did in the past. Absolutely worth checking out. Comes in a jewel case with platic diamonds glued to the outside. I think they are handnumbred but don't know if they are totally limited. Enjoy.

**Raised hide – s/t demo 3€ soon**

After a long break (nearly a year), a new line up and a more complexe style this 5 piece out of berlin is back with a new demo. People that bouth their "old songs and demos" tape from us will remember them as a trashy metalcore band with odd song structures. Well luckily they are more than that now. The musical concept that they had from the beginning is now leaking through the walls of metal. Yeah metal. You will find 3 new songs on that demo wich shows the way raised hide are going. This is more tech metal styled here but not sounding to metal for it. Check this out its worth the 3 euro. Their new material is even better. They plan on releasing a full length next year and a split is already on the way. Comes in a cardboard sleeve packed in an zip log bag. Repress.
